

**Waltzing
Atoms**

the atomic toolbox

Lead Web-Developer

At Waltzing Atoms (a 3DataX project), we develop interactive software connecting stand-alone, web and mobile technology for the semi-conducting industry, for academia and for education.

Our products and services:

- help researchers to have world-wide access to their data
- help teachers to broadcast chemistry content directly in class

Our needs:

We are currently expanding our team by a **lead web-developer** lifting our software solutions to the next level.

Your responsibilities:

- develop modern interactive web applications
- engineer next generation cloud services
- build the company website
- integrate web services into the home page

Your qualifications:

- front end: HTML5, CSS3, JavaScript
- back end: JavaScript, PHP, Python
- familiar with SQL and NoSQL databases
- knowledge of creating responsive web pages
- mastering state of the art frameworks (AJAX, jQuery)
- knowledge of at least one CMS of node.js, AngularJS, Drupal or TYPO3
- familiar with UNIX systems and version control (e.g., git)
- understand modern concepts of software management
- self-responsible approach to project and product management

We offer:

- a professional **small team** of tech enthusiasts
- work and grow within a **high-tech start up**
- flexible work time
- an office in the center of Vienna
- perspective to lead our future web development group
- an annual salary starting at 35.000 Euro before tax (in case of 38.5 hours/week). Note that also milestone-wise payment is possible.

3DataX is an equal opportunity employer – skills count, and nothing else.

Ready to take the challenge?

Send your application (including your CV and a description of reference projects) to **office@waltzingatoms.at**.
