

Web-Developer Chemistry & Education

the atomic toolbox

At Waltzing Atoms, we develop interactive software connecting stand-alone, web and mobile technology for gamification & education.

Our products provide chemistry teachers with mobile tools for the classroom of the 21st century. We are currently looking for a web-developer to join our team in our headquarters at central Vienna.

Your responsibilities:

- build the company website
- integrate web services into the homepage

Your qualifications:

- HTML5, CSS3, JavaScript
- familiar with SQL and NoSQL
- knowledge of creating responsive web pages
- mastering state of the art frameworks (AJAX, jQuery)

We offer:

- a professional small team of tech enthusiasts
- work and grow within a high-tech start-up
- flexible work time
- an annual salary starting at 35.000 Euro before tax (for 38.5 h / week)
- Also milestone-wise payment and freelance is possible

3DataX is an equal opportunity employer - skills count, and nothing else.

Ready to take the challenge?

Send your application (including your CV) to office@waltzingatoms.at.

About Waltzing Atoms @ 3DataX:

3DataX is a software company with a high level of expertise in 3D visualization of chemical, physics and technical data. For the signature product Waltzing Atoms, we develop software for chemistry classes at school and solutions to manage and visualize general R&D data.
